

FOR USE ON CITRUS

Limitations, Restrictions, and Exceptions

FOR USE ON CITRUS:

For use in mechanical foamers or sprays. Dilute one gallon of concentrate with 9 gallons of water. Contact time with citrus should be between 10 and 30 seconds. Follow treatment with adequate fresh water sprays. Also for use in the Decco Process by or under the supervision of DECCO US POST-HARVEST INC. personnel.

- For control of organisms causing decay of citrus after harvest.
- Once opened use the entire contents of the container within 120 days.
