FRUIT TREES: CHERRY - CHERRY LEAF SPOT

General Information

COMBINATION SPRAY WITH INSECTICIDES ON ORNAMENTAL PLANTS

Ortho Max Garden Diseases Control Concentrate may be mixed with the following insecticides for use on ornamental plants (at the label rates for both products): Ortho Bug-B-Gon MAX Lawn and Garden Insect Killer Or Ortho Malathion Plus Insect Spray. Apply fungicide on a regular schedule to control disease and add insecticide only when insect control is desired. Do not apply more than three consecutive applications of combination sprays. Do not use combination sprays with Dial 'N Spray or similar devices.

Limitations, Restrictions, and Exceptions

CHERRY, PLUM AND PRUNE

Spray thoroughly to uniformly cover tree canopy (generally sufficient to treat 200 sq ft).

WHEN TO APPLY:

Do not apply between fruit formation and harvest.

(1) Spray when buds begin to show color.

(2) Reapply at full bloom.

(3) If cool, moist weather continues, make a 3rd application at petal fall.

Additional directions for Cherry Leaf Spot:

(4) Also apply when fruit just begins to form. And

(5) again 7 days after fruit is removed.

(6) Apply once more 10 to 14 days later, if tree has a history of leaf spot.

Method

Spray
Timings

When fruit just begins to form.
