

SOIL APPLICATION

General Information

PRODUCT INFORMATION

NUTRAMIX P SOIL is a highly concentrated nutritional solution. It is designed to meet the need for a soluble liquid minor element spray containing certain nutrients proven to be of value when applied as a properly timed foliage spray. NUTRAMIX P SOIL becomes generally more available for plant food and non-phytotoxic when used as directed. It is absorbed through the leafy tissue of the plant and can be translocated within the plant. NUTRAMIX P SOIL is compatible with most insecticides and minor elements. Phosphorous acid products that are intended to be used as a supplemental fertilizer treatment.

NUTRAMIX P SOIL nutrients can be applied by conventional ground rig for side dressing.

APPLICATION CAUTION: A compatibility test is recommended if mixing NUTRAMIX P SOIL in a tank mix. User assumes full responsibility for product, equipment and plant compatibility. Upon foliar application, the phosphite ions are taken up directly by the plant foliage and may undergo a degree of conversion to phosphate ions, or be utilized directly by the plants, as phosphite ions. As a soil application to annual crops, a lesser response from the initial crop, with a corresponding superior response from succeeding crops, may be observed. In addition, placement close to seeds or root zones may be injurious to crops. The effect may be aggravated by a soil pH below 6.5.

Limitations, Restrictions, and Exceptions

SOIL APPLICATION:

NUTRAMIX P-SOIL can be applied to soil through various types of irrigation and application systems. The application rate is 32 to 64 ounces per acre. Do not exceed 2 gallons of water or 2% volume per application.

- *As soil application to annual crops, a lesser response from the initial crop, with a corresponding superior response from succeeding crops, may be observed.

In addition, placement close to seeds or root zones may be injurious to crops. The effect may be aggravated by a soil pH below 6.5.
