

HEAVY DEFICIENCY (SOIL APPLICATION)

General Information

PRODUCT INFORMATION

CROPS

NUTRAPLEX CALCIUM can be applied to most vegetable crops, row crops, deciduous fruit and nut trees, citrus, avocados, grapes, melons, ornamentals, turf, pasture, range grasses and most other crops.

NUTRAPLEX CALCIUM is a complexed liquid micronutrient for foliar and soil application to agricultural crops. NUTRAPLEX CALCIUM is beneficial in combination with plant food and non-phytotoxic when used as directed. It is absorbed through the leafy tissue and root system of the plant and can be translocated within the plant. NUTRAPLEX CALCIUM is compatible with most insecticides, fungicides, herbicides, liquid fertilizer, and other foliar micronutrients. It is used on most field and row crops, trees, vines, turf and ornamentals. NUTRAPLEX CALCIUM can also be used as an acidifying and dispersing agent in water solutions.

NUTRAPLEX CALCIUM micronutrients have corrected deficiencies of a great many row crops, vegetables, and ornamental plants under soil conditions ranging from high organic matter (muck) to very low organic matter and from strong acid soil (pH 3) to high alkaline soil (pH 8.5) containing considerable calcium carbonate (free lime). NUTRAPLEX CALCIUM can be effective under most varied farming conditions. Differences in soil conditions, climate and plant varieties will determine how much more effective NUTRAPLEX CALCIUM micronutrients are than other sources of micronutrients.

NUTRAPLEX CALCIUM micronutrients are unique in that they can be used in most forms of liquid fertilizers including ammonia solutions. NUTRAPLEX CALCIUM micronutrients can be broadcast on the surface of the soil in water solutions. In fluid fertilizers including suspensions, or in particulate form. This micronutrient can be banded at planting time, side dressed, or sprayed in water solutions directly on deficient plants. Under irrigation, NUTRAPLEX CALCIUM micronutrients can be added to the water of gravity and sprinkler systems. Under irrigation, NUTRAPLEX micronutrients can be applied ahead of disking, plowing or listing. When applied

NUTRAPLEX CALCIUM micronutrients can be used in combination with a nitrogen fertilizer source.

Limitations, Restrictions, and Exceptions

HEAVY DEFICIENCY

Soil Application:

In soil applications the usual carrier is water used at a rate sufficient for thorough coverage. NUTRAPLEX CALCIUM can be applied with liquid fertilizers as a broadcast or banded treatment. Use NUTRAPLEX CALCIUM at a maximum rate of 1 part NUTRAPLEX to 50 parts fertilizer in ammonium phosphate solutions and 1 part NUTRAPLEX CALCIUM to 10 parts fertilizer in nitrogen solutions.
