

TREES INCLUDING APPLES, PEARS, AVOCADOS, CITRUS, NUT AND STONE FRUITS - FOLIAR APPLICATION

General Information

PRODUCT INFORMATION

Start-Up 7.5 %Copper Chelate Solution was formulated for use with basic starter fertilizers pH 6 or higher at planting time. Start-Up 7.5% Copper Chelate Solution can be incorporated in basic liquid fertilizers at time of planting, side dressing application, or other situations where it is difficult to get micronutrients to the root zone.

START-UP is composed of organic carriers of Citric Acid which forms a very strong chelated bond when processed.

Copper becomes more available when combined and applied with a good nitrogen source. To insure that maximum copper uptake is obtained we have incorporated a nitrogen source in our START-UP product line.

Limitations, Restrictions, and Exceptions

TREES INCLUDING APPLES, PEARS, AVOCADOS, CITRUS, NUT AND STONE FRUITS

Foliar Application - Thoroughly wet the leaves using 2 qt. per 100 gallon (2 liter per 378 liters) of water in early spring shortly after trees are in full leaf. For severe deficiency, follow with a second application two weeks later. Do not apply during bloom.
