

# FIELD CROPS INCLUDING CORN, SORGHUM, BEANS AND COTTON - FOLIAR APPLICATION

General Information

## PRODUCT INFORMATION

START-UP Fe & Mn Chelate Solution was formulated for use with basic starter fertilizers Ph 6 or higher at planting time.

START-UP Fe & Mn Chelate Solution can be incorporated in basic liquid fertilizers at time of planting, side dressing application, or other situations where it is difficult to get micronutrients to the root zone.

START-UP is composed of organic carriers of Citric Acid which forms a very strong chelated bond when processed.

Fe & Mn generally become more available when combined and applied with a good nitrogen source. To insure that maximum manganese uptake is obtained we have incorporated a nitrogen source in our START-UP product line.

Limitations, Restrictions, and Exceptions

## FIELD CROPS INCLUDING CORN, SORGHUM, BEANS AND COTTON

Foliar Application - Apply 1 qt. Per 100 gallons of solution 4 to 6 weeks after planting. Do not apply during bloom.
