

FIELD CROPS (CORN, SORGHUM, BEANS AND COTTON) - SOIL APPLICATION

General Information

PRODUCT INFORMATION

START-UP 5% MANGANESE CHELATE SOLUTION was formulated for use with basic starter fertilizers pH 6 or higher at planting time.

START-UP 5% MANGANESE CHELATE SOLUTION can be incorporated in basic liquid fertilizers at time of planting, side dressing application, or other situations where it is difficult to get micronutrients to the root zone.

START-UP is composed of organic carriers of Citric Acid which forms a very strong chelated bond when processed.

MANGANESE generally becomes more available when combined and applied with a good nitrogen source. To insure that maximum manganese uptake is obtained we have incorporated a nitrogen source in our STARTUP product line.

Limitations, Restrictions, and Exceptions

FIELD CROPS (CORN, SORGHUM, BEANS AND COTTON)

Soil Application – Apply 2 to 5 qts. Manganese Chelate per acre in starter fertilizer. Rate will depend on extent of deficiency and soil conditions.
