

# **TREES (APPLES, PEARS, AVOCADOS, CITRUS, NUT AND STONE FRUITS) - FOLIAR APPLICATION**

General Information

## PRODUCT INFORMATION

START-UP 5% MANGANESE CHELATE SOLUTION was formulated for use with basic starter fertilizers pH 6 or higher at planting time.

START-UP 5% MANGANESE CHELATE SOLUTION can be incorporated in basic liquid fertilizers at time of planting, side dressing application, or other situations where it is difficult to get micronutrients to the root zone.

START-UP is composed of organic carriers of Citric Acid which forms a very strong chelated bond when processed.

MANGANESE generally becomes more available when combined and applied with a good nitrogen source. To insure that maximum manganese uptake is obtained we have incorporated a nitrogen source in our STARTUP product line.

Limitations, Restrictions, and Exceptions

TREES (APPLES, PEARS, AVOCADOS, CITRUS, NUT AND STONE FRUITS)

Foliar Application - Thoroughly wet the leaves with a solution of 1 qt. per 100 gallons of water in early spring shortly after trees are in full leaf. For severe deficiency, follow with a second application two weeks later. Do not apply during bloom.
