

GRAPE VINEYARDS - SOIL APPLICATION

General Information

PRODUCT INFORMATION

START-UP 5% MANGANESE CHELATE SOLUTION was formulated for use with basic starter fertilizers pH 6 or higher at planting time.

START-UP 5% MANGANESE CHELATE SOLUTION can be incorporated in basic liquid fertilizers at time of planting, side dressing application, or other situations where it is difficult to get micronutrients to the root zone.

START-UP is composed of organic carriers of Citric Acid which forms a very strong chelated bond when processed.

MANGANESE generally becomes more available when combined and applied with a good nitrogen source. To insure that maximum manganese uptake is obtained we have incorporated a nitrogen source in our STARTUP product line.

Limitations, Restrictions, and Exceptions

GRAPE VINEYARDS

Soil Application – Apply 2 to 6 qts. Manganese Chelate per acre depending on soil type or extent of deficiency.
