

TURF

General Information

PRODUCT INFORMATION

HUMIPLUS ORGANIC BIO-STIMULANT 75 can be applied to most vegetable crops, row crops, deciduous fruit and nut trees, citrus, avocados, grapes, melons, ornamentals, turf, pasture, range grasses, and most other crops.

HUMIPLUS ORGANIC BIO-STIMULANT 75 is a concentrated technical Bio-Stimulant liquid which is compatible with most fertilizers and micronutrients to help produce nutrient healthier crops.

HUMIPLUS ORGANIC BIO-STIMULANT 75 may aid in the uptake of micronutrients.

In the production of a fertile soil, organic Bio-Stimulants play a direct part as they are the sources of plant nutrients which are liberated in available forms during mineralization. But organic substances also play an indirect role. Besides being a source of nutrients for the plant and the most important factor in structure formation, organic matter has also a fundamental effect on the physical properties of the soil, (water-holding capacity) and determines to a larger degree such physicochemical properties as the exchange capacity and buffering properties; these properties are of great importance not only in controlling the up-take of nutrients by the plant and their retention in the soil, but also in suppressing the deleterious effect of soil acidity. There is also conclusive that quite small amounts of certain organic substances (highly dispersed organic bio-stimulants) have a definite positive effect on the growth and development of the plant.

Can be used with Drip Irrigation, Fertigation or Flood Irrigation.

Limitations, Restrictions, and Exceptions

TURF

- Apply every two weeks to maintain color and growth.
