

FOLIAR APPLICATION - TREE CROPS

General Information

PRODUCT INFORMATION

CROP PLUS 12-5-5 is a highly concentrated nutritional solution. It is designed to meet the need for a soluble liquid minor element spray containing certain nutrients proven to be of value when applied as a properly timed foliage spray.

CROP PLUS 12-5-5 is beneficial in combination with plant food and non phytotoxic when used as directed. It is absorbed through the leafy tissue of the plant and quickly translocated within the plant.

CROP PLUS 12-5-5 is compatible with most insecticides and minor elements. It is designed for use as a supplement to a well balanced fertilizer program.

CROP PLUS 12-5-5 nutrients can be applied by conventional ground rig, concentrate sprayer, and by air. With farms becoming larger and more specialized and farmers desiring to get crops planted earlier there definitely is a trend for applying less fertilizer at planting time and broadcasting or side-dressing larger quantities at other than planting time.

CROP PLUS 12-5-5 is designed to supplement a well balanced fertilizer program and ensure the plants obtain proper nutrients during high growth periods which is so essential to high yields.

CROP PLUS 12-5-5 provides a fast method of giving plants a nutrient boost thru leaf absorption. CROP PLUS 12-5-5 will protect crops from nutrient deficiencies during those crucial growing periods when any drop in nutrients will result in a production drop. CROP PLUS 12-5-5 nutrients have corrected deficiencies of a great many row crops, vegetables, and ornamental plants under soil conditions ranging from high organic matter (muck) to very low organic matter and from strong acid soils (pH 3) to high alkaline soils (pH 8.5) containing considerable calcium carbonate (free lime). CROP PLUS 12-5-5 can be effective under varied farming conditions. Differences in soil conditions, climate and plant varieties will determine how much more effective CROP PLUS 12-5-5 nutrients are than other sources of nutrients.

Limitations, Restrictions, and Exceptions

TREE CROPS 1/2-1 gallon/acre Apply 12-5-5 on tree crops using the following dilution rates:

Aerial applications: Use a maximum of 1 quart of 12-5-5 per 5 gallons of water.

Dilute spray: Use a maximum of 1 gallon of 12-5-5 per 200-500 gallons of spray solution.

Concentrated spray: Use a maximum of 1 gallon of 12-5-5 per 50-150 gallons of concentrated spray solution. If trees are sprayed several times a year the above application rates can be split according to the number of yearly applications. Split applications are considered more beneficial than single applications.
