

ASPARAGUS

General Information

PRODUCT INFORMATION

Custom Mix 18-5-5 is a highly soluble, low salt index formulation developed to supplement standard soil fertility practice.

Custom Mix 18-5-5 provides an additional source of nitrogen, phosphorous and potassium nutrients during the growing season. Custom Mix 18-5-5 is designed to be used in concert with soil and tissue tests and professional recommendations to manage the nutrients levels and nutrient balance within the crop. Custom Mix 18-5-5 is in the form readily absorbed by plant tissue. In this form nitrogen, phosphorous and potassium can be applied to the growing plant.

Custom Mix 18-5-5 is a highly concentrated nutritional solution. It is designed to meet the need for soluble liquid minor element spray containing certain nutrients proven to be value when applied as a properly timed foliage spray.

Custom Mix 18-5-5 is completely available for plant food and non-phytotoxic when used as directed. It is absorbed through the leafy tissue of the plant and quickly translocated to deficient areas of the plant.

Custom Mix 18-5-5 is compatible with most insecticides and minor elements. It is designed for use as a supplement to a well balanced fertilizer program.

Custom Mix 18-5-5 nutrients can be applied by conventional ground rig, concentrate sprayers, and by air.

With farms becoming larger and more specialized and farmers desiring to get crops planted earlier there definitely is a trend for applying less fertilizer at planting time and broadcasting or side dressing larger quantities at other than planting time.

Custom Mix 18-5-5 is designed to supplement a well balanced fertilizer program and ensure the plant obtains proper nutrients during high growth periods which is so essential to high yields.

Custom Mix 18-5-5 provides a fast method of giving plants a nutrient boost thru leaf

absorption.

Custom Mix 18-5-5 will protect crops from nutrients deficiencies during those crucial growth periods when any drop in nutrients will result in a production drop.

Custom Mix 18-5-5 nutrients have corrected deficiencies of a great many row crops, vegetables, and ornamental plants under soil conditions ranging from high organic matter (muck) to very low organic matter and from strong acid soils (pH 3) to high alkaline soils (pH 8.5) containing considerable calcium carbonate (free lime).

Custom Mix 18-5-5 can be effective under dry land and irrigation farming conditions. Differences in soil conditions , climate and plant varieties will determine how much more effective Custom Mix 18-5-5 nutrients are than other source of nutrients.
