

ROW CROPS

General Information

GENERAL INFORMATION:

Broad Bio is a broad spectrum biological food substrate, intended to promote the growth of soil microbiology. This product is for use in soil and water run applications. It is intended to be a supplement to a fertility program. Always monitor crop nutrient needs and responses with a soil, leaf tissue and irrigation water analysis program.

DIRECTIONS FOR USE

The product is not intended for foliar applications.

SOIL APPLICATIONS:

Soil apply via mechanical application through direct spray or injection to the soil (broadcast, banded, soil injection, side dress). Mix in clean tank with sufficient water for adequate mixing and coverage of target areas.

WATER RUN:

This material may be water run via drip, micro sprinklers, flood, and furrow. When applying this material via a fertigation system, continue to operate the system 30-60 minutes after material has completely injected to flush clean water through the system.

PRECAUTIONS:

- Since many pesticide products can be neutralized and/or tied up by soil organic matter, it is highly recommended not to use pesticides applied directly with humic acids. Consult pesticide representative before using on a large scale.
- Agitate prior to use.
- Due to the dark color of this material, avoid application methods that may cause this product to come into contact with the harvested portion of the plant, to avoid

spotting.

- Avoid application methods that may cause this product to come into contact with produce intended for human consumption.

Limitations, Restrictions, and Exceptions

ROW CROPS

- Apply 10-15 gals of Broad Bio per acre as a pre plant, starter, side dress or in water runs. Apply in 14 day intervals.
