

# **GARDEN PLANTS, FLOWERS, SHRUBS AND TREES**

## General Information

### MIX WELL BEFORE USING

EnviroYard feeds herbaceous garden plants, shrubs, trees, cactus, succulents and turf.

Directions For Use: Shake well before use as some settling may occur. Use when establishing new turf/lawns or on established turf where a soil test proves a need for phosphorus. In either case, apply only when turf is actively growing. Do not apply near water, storm drains or drainage ditches. Do not apply if heavy rain is expected. Apply this product only to your lawn/garden. Check with your local Cooperative Extension Agency to obtain specific information on local turf best management practices. Check with your county or city government to determine if there are local regulations for fertilizer use. In Virginia, this lawn/turf fertilizer contains phosphorus and is only for non-agricultural use on (i) turf during its first growing season, (ii) on turf areas being repaired or renovated and (iii) on turf where a soil test performed within the last 3 years indicates a phosphorus deficiency. This fertilizer is not for the routine maintenance of turf.

## Limitations, Restrictions, and Exceptions

Garden Plants, Flowers, Shrubs and Trees: Dilute one-half to one fluid ounce in one to two gallons of water and apply to the soil around the base of plants. Apply one-quarter to one-half gallon of fertilizer mixture for every square foot of area. Applications can be made every 10-14 days. Use the lower rate for consistently repeated applications.
