

CONTROL THE GROWTH OF ALGAE IN DECORATIVE FOUNTAINS AND PONDS

General Information

DIRECTIONS FOR USE

AlgAway 60 is used to control the growth of algae in decorative fountains and ponds that do not contain fish. For maximum effectiveness decorative fountains and ponds containing heavy algae growth should be cleaned prior to using AlgAWay 60.

Decorative fountains and ponds having just visible algae growth require an initial dose of 1 to 2 fluid ounces of AlgAway 60 per 1,000 gallons of water. Subsequent additions of 0.2 to 0.4 fluid ounces of AlgAway 60 should be made every 5 to 7 days after initial treatment for maintenance.

AlgAway 60 is effective at both acid and alkaline pH.
