

## **CATCH BASIN, TIDAL WATER, ETC. - FOR MODERATE POPULATIONS OR ORGANIC CONTENT**

### General Information

#### GENERAL INFORMATION

AllPro Sustain MBG is a highly selective microbial insecticide effective against mosquitoes in a variety of habitats. Apply this product to any water sites except treated, finished water reservoirs or drinking water receptacles. This product can be applied to areas that contain aquatic life, fish and plants. This product can be applied to areas used by or in contact with humans, animals, horses, livestock, pets, birds or wildlife.

#### Specific Application Instructions

Apply 1.25 – 5 pounds of this product per acre with conventional aircraft or ground equipment. Use higher application rates in heavily polluted water, when mosquito populations are high, when larvae are nearly grown or in fourth instar, and when aquatic or covering vegetation is dense. Most treatments require not more than 5 pounds/acre. Apply only against mosquito larvae not pupae. Avoiding spray drift at the application site is the responsibility of the applicator. The interactions of many equipment and weather-related factors determine the potential for spray drift. The applicator and the grower are responsible for considering all these factors when making decisions.

Do not apply this product through any type of irrigation system.

#### Limitations, Restrictions, and Exceptions

#### CATCH BASIN, TIDAL WATER, ETC. - FOR MODERATE POPULATIONS OR ORGANIC CONTENT

Rate Required for Control: Allow 24 hours for control. Under certain conditions, such as catch basins, sewage waste lagoons, high pollution or organic content, heavy vegetative cover and high mosquito populations, double the above application rates.
