

PERIMETER APPLICATION

General Information

DIRECTIONS FOR USE

Do not apply more than 0.2 lb. active ingredient (a.i.) per acre per application on residential use sites (i.e., around private homes, apartment buildings, condominiums, non-agricultural outbuildings, non-commercial greenhouses, pre-schools or day care facilities). May be applied at up to 0.4 lb. a.i. per acre per application on non-residential use sites (i.e., around institutional, public, commercial or industrial buildings; parks; recreational areas or athletic fields).

Aerial application is prohibited.

Do not broadcast apply more than 0.4 lb. a.i. (200 lbs. UP-Star GC Granular) per acre per year.

Do not apply within 25 feet of lakes, reservoirs, rivers, permanent streams, marshes or natural ponds, estuaries, and commercial fish farm ponds.

Not for use on nurseries, in commercial greenhouses or on grass grown for seed.

Do not apply this product in a way that will contact workers or other persons, either directly or through drift. Only protected handlers may be in the area during application. For any requirements specific to your State or Tribe, consult the agency responsible for pesticide regulation.

Limitations, Restrictions, and Exceptions

PERIMETER APPLICATION

Apply to the ground in an area 5 to 10 feet wide around and next to the structure.

Note: Use the following formula to determine the area to be treated: Multiply the linear distance by the band width and then add to their value the area of a circle whose radius is equal to the band width (to account for the area treated at the four corners of a rectangular structure).

- Refer to Pounds of UP-Star GC Granular for Perimeter Applications Linear Distances

(Feet) Around Structure on the label for specific rate instructions.
