

NEW LAWNS, ESTABLISHED LAWNS, AND COOL SEASON GRASSES

General Information

GENERAL INFORMATION

Use any time of the year (even when moss is not present)

Sweep or blow (do not wash) all fertilizer materials from surfaces immediately after application, because certain fertilizer ingredients can cause permanent stains. Do not apply to concrete, masonry, wall siding or stucco surfaces. If applied by accident brush or sweep off immediately. Keep out of pools.

NOTE: All products containing soluble iron will stain masonry and clothing. Sweep or blow off immediately, if spilled. Do not wash off with water. Wash spreading equipment thoroughly after use.

Children and pets may walk on a treated lawn after the dust settles from the application. To take extra precautions, avoid contact with treated lawn until the following day.

DIRECTIONS FOR USE

It is a violation of Federal Law to use this product in a manner inconsistent with its labeling.

1. Rake lawn lightly to remove leaves, dead grass and other debris.
2. Mow lawn to expose moss and to allow fertilizer to penetrate the turf canopy.
3. Apply uniformly at the recommended rate using a lawn spreader. Contents of this bag cover up to 5,000 sq. ft. for moss control or up to 7,500 sq. ft. for fertilization.
4. Water thoroughly immediately after application to wash fertilizer particles off grass and down into the soil.
5. Sweep or blow off sidewalks, driveways and painted surfaces as ferrous sulfate

may stain concrete.

HOW TO APPLY: Apply one pass evenly with a properly calibrated drop type or rotary spreader. A two-pass application, crisscrossing the area at half the rate each time is the same as one application. Always apply with fertilizer spreader. Do not apply by hand.

Spreader settings are approximate. The conditions of your spreader, the speed at which you walk and the width between spreader passes may cause differences in the rate of application.

Limitations, Restrictions, and Exceptions

NEW LAWNS, ESTABLISHED LAWNS, AND COOL SEASON GRASSES

Bluegrass, Bentgrass, Fescues, Ryegrass - apply 3 - 10 pounds per 1,000 sq. ft. in the spring and fall. Early spring treatment will give grasses a head start.

This product is an excellent lawn fertilizer to apply SPRING, SUMMER AND FALL.

The extra water soluble iron supplied by ferrous sulfate turns your lawn a beautiful deep green in just 2-3 days.
