

## **EVERGREEN AND DECIDUOUS TREES, LARGE SHRUBS**

### General Information

Refer to the product label for the Dilution Rate.

### Limitations, Restrictions, and Exceptions

#### EVERGREEN AND DECIDUOUS TREES, LARGE SHRUBS

- Apply the injection solution at a rate of 5 gals per inch of tree trunk diameter. (Example tree trunk size of 6 inches would equal 30 gallons of injection solution)
- Soil injection should be 8 to 12 inches deep using injection probe.
- Injection rate equals 0.20 lb N, 0.08 lb of phosphate, 0.09 lbs of potash.
- Injections should begin 2 feet out from trunk and be spaced 2.5 apart and extending 2 ft beyond the drip line, using a grid system.
