

## **FOLIAR APPLICATION - FRUIT AND TREE NUTS, ETC.**

### General Information

#### GENERAL INFORMATION

CM LIQUID Zn / Mn 7-4 is a non-phytotoxic micronutrient for foliar and soil application. CM LIQUID Zn / Mn 7-4 may be used alone or with pesticides and may also be applied directly to soil. This liquid formulation is recommended for all field, row, vegetable, fruit, tree, vine, ornamental and turf crops.

#### COMPATIBILITY

Fertilizer compatibility: CM LIQUID Zn / Mn 7-4 is compatible with most nitrogen solutions. With liquid fertilizer, agitate to disperse the trace elements. When mixing in batch tank, add this product to water or nitrogen solution before adding phosphate material. Pesticide compatibility: This product is compatible with most pesticide solutions.

Always check for compatibility when adding this product to any other type of fertilizer or pesticide solution, especially concentrates.

#### RATES FOR USE

Note: For best absorption into the plant, apply this product in early morning or late evening.

#### Limitations, Restrictions, and Exceptions

#### FOLIAR APPLICATION

Apply 1 to 4 quarts per acre as needed on a 10-14 day schedule for tree fruit and nut trees, beans, corn, cotton, field and vegetable crops, potatoes, rice and other fruit and berry crops.

When rates of over 2 quarts are required, split applications of 2 quarts or less are recommended. Avoid foliar applications of CM LIQUID Zn/Mn 7-4 when plants are under stress due to lack of moisture.
