

VEGETABLE CROPS

General Information

GENERAL INFORMATION

- DO NOT use when the crop is under stress from pests, heat or inadequate soil moisture.
- Do NOT mix or apply 3-18-18 liquid fertilizer with non-100% EDTA chelated calcium, magnesium, copper, manganese, zinc or iron compounds, antibiotics, sulfate or chloride salts or spray oils.
- DO NOT apply by aircraft if surface wind is greater than five miles per hour to assure adequate crop coverage and droplet disposition.
- DO NOT spray to run off. Do not spray to visible droplet coalescence. Do not allow concentrated spray mist to run off fruit or leaves.
- DO NOT apply during the heat of the day.
- DO NOT mix with calcium containing products unless the calcium is fully EDTA chelated.
- DO NOT mix with hard water. Mixing with hard water may cause clogging of lines due to the combining of calcium, magnesium and iron in the water with phosphate in the fertilizer.

Limitations, Restrictions, and Exceptions

VEGETABLE CROPS

- Use every 7-10 days on vegetable crops starting 10-15 days after transplant or at 2"-5" tall on seeded crops.
