

ROUGHHS

General Information

For Best Results: Flat fan spray nozzles are recommended when applying TURF TRAX BLUE HC. Application equipment should be clean, in good operating condition, and properly calibrated to deliver the recommended spray volume per measured area treated. Increasing the total volume of spray solution will enhance the visual marking of non-uniform surfaces, such as longer or thinner stands of turf, or applications made over a broad range of ornamental vegetation and tree canopies.

Limitations, Restrictions, and Exceptions

ROUGHHS

Area to be sprayed: ounces/100 gallons spray solution

Dormant: 12 to 18 oz

Light: 18 to 24 oz

Dark: 24 to 30 oz
