

FERTILIZER IMPREGNATION

General Information

GENERAL INFORMATION

VERSATILE-IDS Manganese is a fully-chelated micronutrient containing 5% manganese, formulated with patented Baypure IDS chelate. VERSATILE-IDS Manganese is effective and safe for both soil and foliar applications, is stable across a wide range of soil or spray tank solution pH and will not degrade in the presence of buffer adjuvants. VERSATILE-IDS Manganese is ortho and polyphosphate compatible and offers exceptional tank-mix compatibility with other fertilizers and pesticides. VERSATILE-IDS Manganese is ideal for foliar, soil or irrigation system applications and will not foul low volume irrigation systems. VERSATILE-IDS Manganese should be used as part of a comprehensive Total Nutrition System for optimizing plant growth, development, yield and quality.

Directions for use

VERSATILE-IDS Manganese may be applied via foliar treatment, soil injection, surface dribble or spray, water run, or application through irrigation conveyance systems.

Limitations, Restrictions, and Exceptions

FERTILIZER IMPREGNATION

- Versatile-IDS Magnesium may be used to coat dry fertilizers to maximize distribution uniformity of the desired micronutrients. Rates as high as 2.5 gallons per ton may be used depending on the dry fertilizer to be coated, blender and prevailing environmental conditions.
