

COTTON - LATE SEASON USE (FIRST BLOOM TO 30 DAYS PRIOR TO HARVEST)

General Information

APPLICATION DIRECTIONS

BIDRIN 8 must be used in a closed delivery system (See Engineering Controls on the label).

BIDRIN 8 is a water-miscible product which contains 8 lbs of active ingredient per gallon. For foliage applications, mix the required amount of BIDRIN 8 in sufficient water to provide uniform coverage.

Limitations, Restrictions, and Exceptions

COTTON

Do not apply more than 16 fl. oz./ac of BIDRIN 8 (1.0 lb. a.i./ac) during this growth period.

Apply by air or ground to give uniform coverage.

The minimum application interval between applications is 14 days.

Do not graze livestock on treated fields or feed treated gin trash.

Aphids, Spider mites: Suppression.
