

AS A GENERAL WETTING AGENT

General Information

GENERAL INFORMATION

AD-SPRAY SC is a unique blend of surfactants designed to enhance the penetration of water-based sprays through plant foliage and soil. AD-SPRAY SC is an effective wetting agent for potting, growing media, and difficult-to-wet soils.

Refer to the product label for the AD-SPRAY SC Maintenance Program.

Limitations, Restrictions, and Exceptions

AS A GENERAL WETTING AGENT

AD-SPRAY SC may be used with products designed for the following applications: Agricultural, aquatic, forestry, industrial, non-cropland, ornamental, rights-of-way, turf, and others.

USE RATES (General):

Use in sufficient water to ensure penetration of water-based sprays through foliage and soil.
