

# **FOLIAR APPLICATION - COTTON, VEGETABLES, CEREAL GRAINS, PEANUTS AND OTHER CROPS**

## General Information

### GENERAL INFORMATION

0.63 lbs/gal of Nitrogen, out of 1.25 lbs/gal of the total Nitrogen in the product, is controlled release. The product is recommended for use as a supplement to a well balanced fertilizer program only. CoRoN Full Bor is intended as a supplement to a regular fertilizer program and will not, by itself provide all the nutrients normally required by agricultural crops. However, it can improve the general plant condition by providing safe, effective foliar Boron and slowly available Nitrogen.

**PRECAUTION:** Use of the product in accordance with label directions is not expected to adversely affect normal vegetative and/or reproductive growth in most situations. However, various environmental and agronomic factors, such as crop stress associated with high temperatures and/or dry conditions, make it impossible to eliminate all risks associated with the use of the product; therefore, crop injury is always possible. The user assumes all risks of use and handling. In an effort to reduce the risk of crop injury, apply early morning or late evening.

### GENERAL RECOMMENDATIONS

CoRoN Full Bor may be applied by air, ground, or through irrigation systems. Use enough water for thorough, uniform coverage of foliage. CoRoN Full Bor is compatible with most pesticides and other fertilizers, but a “jar test” is recommended for unfamiliar tank mixes to ensure compatibility.

### Limitations, Restrictions, and Exceptions

### FOLIAR APPLICATION - COTTON, VEGETABLES, CEREAL GRAINS, PEANUTS AND OTHER CROPS

- Apply as recommended by your local agricultural authority. Repeat as necessary.
