

## **AERIAL APPLICATION - TREES AND VINE CROPS (EXCLUDING CITRUS)**

### General Information

#### GENERAL INFORMATION:

ChelStar 5.5% Magnesium Chelate is a fully chelated, water-soluble, powdered form of iron EDTA useful for prevention and correction of magnesium deficiency in crops. Soil application is the preferred application method to prevent magnesium deficiency. Foliar application, however, will provide correction when a soil application is impractical.

### Limitations, Restrictions, and Exceptions

#### TREES AND VINE CROPS

- Apply ChelStar 5.5% Magnesium Chelate in sufficient spray volume for thorough coverage (25 gal. minimum) at dormant/delayed dormant before bloom, then after full bloom at 2 to 3 week intervals as needed.
