

HERBICIDES, DEFOLIANTS, DESICCANTS AND FERTILIZERS

General Information

GENERAL USE INFORMATION

Chemurgic's MVO is a spray adjuvant designed to maximize the performance of fertilizers, post emergent herbicides and other crop protection products that recommend the use of a methylated seed oil.

Chemurgic's MVO was developed as a replacement for non-ionic surfactants and crop oil (petroleum oils).

USE PRECAUTIONS: If using on sensitive crops, use the lower rate but first test on a small scale to check for damage to the crop before applying to a larger area.

Limitations, Restrictions, and Exceptions

HERBICIDES, DEFOLIANTS, DESICCANTS AND FERTILIZERS

- Use 1 to 4 pts. per acre. Do not use this product at a rate greater than 5% by volume of the finished spray solution. This product may be used as a diluent for basal bark treatments with herbicides.

NOT FOR AQUATIC USE IN WASHINGTON STATE
