

SOIL APPLICATION - FOR MAINTENANCE

General Information

GENERAL INFORMATION: Chemurgic's Pacific Multi-Mix Ligno+ is formulated to correct and prevent micronutrient deficiencies in various fruit, nut, vine, vegetable and row crops, and ornamentals. Chemurgic's Pacific Multi-Mix Ligno+ is a multi-mineral source complexed with lignosulfonate. Yucca schidigera is added to increase wetting and improve coverage of plant surfaces.

DIRECTIONS FOR USE: For soil applications, we recommend using Chemurgic's Pacific Multi-Mix Ligno+ with nitrogen fertilizer solutions.

For best uptake in foliar applications of this product:

- Thoroughly cover and wet foliage.
- Apply to actively growing plants with young leaves.
- Apply just after irrigation or rainfall.
- Add urea (for example, 5 lbs. Lo-Bi Urea per 100 gal. of spray solution).

Compatibility: Compatible with most pesticides and fertilizers. If the desired combination has not been previously used, a compatibility test is recommended.

Mixing: Agitate product container prior to application. Always add Chemurgic's Pacific Multi-Mix Ligno+ to the mixing tank before adding pesticides.

Limitations, Restrictions, and Exceptions

SOIL APPLICATION: Use lower rates for field, row and vegetable crops, and higher rates for fruit, ornamental, tree, turf and vine crops.

If Using Fertigation: Split the recommended amount between two applications, 7-14 days apart. Continue schedule through the growing season.

Dilute Applications: Apply the recommended dose in enough water for thorough coverage.
