

USE OF QUAD 7 SPRAY ADJUVANT

General Information

GENERAL INFORMATION:

QUAD 7 Spray Adjuvant is a multi-component product designed to optimize retention and absorption of many herbicides. QUAD 7 may enhance performance of other post-emergence products requiring non-ionic surfactant and fertilizer. QUAD 7 was designed specifically to enhance Accent, Basis, Steadfast, Pursuit, Raptor and other herbicides. Do not use with Assert.

The addition of nitrogen based fertilizers (such as 28% N, 32% N, or 10-34-0) or ammonium sulfate are generally not required with QUAD 7. Follow herbicide label directions.

Limitations, Restrictions, and Exceptions

DIRECTIONS FOR USE:

Use QUAD 7 Spray Adjuvant at 1% v/v (1 gal. per 100 gal. spray mixture); use QUAD 7 at 2% v/v when applying pesticide spray mixture at 5 gpa or less.

Add QUAD 7 last to spray mixture and continue agitation or follow specific tank filling and mixing information provided on the herbicide label. Refer to herbicide label for additional recommendations or precautions. Some pesticides have stated adjuvant use rates, in all cases, the pesticide manufacturer's label should be consulted regarding specific adjuvant use recommendations and that rate followed. Do not add adjuvant at a level that would exceed 5% of the finished spray volume.
