

FOLIAR APPLICATIONS FOR ALL CROPS - AERIAL APPLICATIONS

General Information

General Information

BRANDT ORGANICS TREE & VINE MIX is recommended to prevent and correct micronutrient deficiencies of field, row, vegetable, fruit, tree, and vine crops. Applied alone, with pesticides, or with other fertilizers, this product may be applied directly to the soil or to the foliage of growing crops via ground sprayers, aircraft or fertigation systems.

Limitations, Restrictions, and Exceptions

Foliar Application: Actively growing plants with young leaves absorb foliarly applied BRANDT ORGANICS TREE & VINE MIX most efficiently. Immediate post-irrigation or post-rainfall application will enhance foliar uptake. Thorough coverage and wetting are needed for optimum foliar spray results.

Applications should be separated by a minimum of 7-14 days. AVOID foliar applications of this product when plants are under moisture stress. AVOID foliar applications to deciduous tree crops during bloom.

Aerial: Up to 1 quart per 5 gallons of spray may be used, but more dilute solutions will improve coverage and results.
