

GRAPES

General Information

GENERAL RECOMMENDATIONS

FOR USE AS A SOIL APPLIED NUTRITIONAL SPRAY

SOIL APPLICATION: TECH-CARB can be applied alone or with other fertilizer materials in starter, broadcast, water run, injection or side dress applications. When applying with other nutrients it is recommended to dilute TECH- CARB with 2-10 gallons of water with the other fertilizer. When applying in drip systems, add TECH-CARB after any sand filtration equipment.

Limitations, Restrictions, and Exceptions

GRAPES

Apply 1-4 qts. per acre per application starting at early leaf development. Repeat every 4 weeks as necessary.
