

POTATO YAM

General Information

APPLICATION: SHAKE WELL before using. Dilute with water to obtain uniform coverage. Dilution depends on spraying equipment. For high volume sprayers dilute 1:200 to 1:1000.

For low volume sprayers dilute 1:20 to 1:100. To co-apply with agrochemicals, dilute 1 part NUTRIPLANT AG with 5 parts water prior to mixing with pre-diluted chemicals. Because available formulations of agrochemicals differ widely, a small test area should be treated prior to large scale mixing to determine that no undesirable effects occur. For best results apply in the evening or early morning.

Limitations, Restrictions, and Exceptions

POTATO YAM

2 applications - 6-8 leaf stage and again 4 weeks later.
