

RAPESEED, CANOLA

General Information

APPLICATION: SHAKE WELL before using. Dilute with water to obtain uniform coverage. Dilution depends on spraying equipment. For high volume sprayers dilute 1:200 to 1:1000.

For low volume sprayers dilute 1:20 to 1:100. To co-apply with agrochemicals, dilute 1 part NUTRIPLANT AG with 5 parts water prior to mixing with pre-diluted chemicals. Because available formulations of agrochemicals differ widely, a small test area should be treated prior to large scale mixing to determine that no undesirable effects occur. For best results apply in the evening or early morning.
