

TOMATO

General Information

GENERAL INFORMATION

Growth Enhancement

Use Consensus® to increase plant health and vigor, to increase root mass, and to enhance crop quality and production.

Limitations, Restrictions, and Exceptions

USE RESTRICTIONS

Not for use on agricultural establishments in hopper-box, planter-box, slurry-box or other seed treatment applications at or immediately before planting.

Coloring

All seed treated commercially with this product must be colored with an EPA-approved dye or colorant of a suitable color to prevent accidental use as food for man or feed for animals.

Mixing with Other Seed Treatment Products

Read and follow the entire label of each product to be used in combination with this product.

Use Promptly

Use product within 8 hours of mixing with water. Reseal unopened containers to minimize exposure to air and moisture.

APPLICATION INSTRUCTIONS

Consensus may be applied as a seed treatment by commercial seed treatment facilities. Mix thoroughly and treat seed. Use application rates as specified on crops listed below. Consensus may be mixed with certain other commercial seed treatments. Use of the resulting mix must be in accordance with the more restrictive label limitations and precautions. Allow treated seeds to dry as appropriate before further handling.

Slurry Treatment

Consensus may be applied as a water-based slurry through standard slurry or mist-type commercial seed treatment equipment. Add an EPA-approved dye (40 CFR Section 180.910-920) or colorant that imparts unnatural color to resulting slurry. Mix the slurry thoroughly with the seeds to provide uniform coverage.

Consensus must be applied with a total slurry of at least 6.0 fluid ounces per 100 pounds of seeds. Note that this slurry volume may be composed of water or other EPA approved insecticides, fungicides, or other seed treatments. Always apply enough solution to ensure adequate seed coverage.

Rates

-

Restricted Entry Interval

4 hours

Exception: After treated seeds are planted, the Worker Protection Standard, under certain circumstances, allows workers to enter the planted areas if there will be no contact with anything that has been treated.
