

CORN

General Information

GENERAL INFORMATION

ADVANCE is a plant growth enhancer that contains a blend of highly-refined nutrients and natural carboxylic acids that enhance solubilization and uptake of plant nutrients. Advance can be used in a variety of applications as a soil application to aid early season plant development.

DIRECTIONS FOR USE

For in-furrow, banded, side-dressed and broadcast applications through conventional equipment.

With the use of this product, best results are obtained when ADVANCE is incorporated, injected or applied alone in a narrow band as close as possible to the germination and rooting zone of the crop (minimum depth 2 - 4 inches). The recommendations for the use of this product are based upon the best current information available.

When used in conjunction with pesticides, always read and follow pesticide manufacturer's label. Ask your dealer about more specific applications for Advance.

Limitations, Restrictions, and Exceptions

Apply as an in-furrow application or mixed with starter fertilizer.
