

# GENERAL SOIL APPLICATIONS

## General Information

### GENERAL RECOMMENDATIONS

Aventine is a heavily chelated nutrient blend formulated for use with most liquid fertilizers and foliar sprays. Aventine contains a blend of key nutrients (K, S, Zn, Mn and B) which helps supplement a phosphorus starter fertilizer minimizing these key nutrients from being yield limiting factors. Aventine is intended for use and is compatible with most orthophosphate and polyphosphate fertilizers.

### DIRECTIONS FOR USE

Use Aventine in conjunction with sound agronomic management practices including a balanced fertility program. Refer to the requirements of your state for specific crop recommendations.

### APPLICATION INSTRUCTIONS

**GENERAL GUIDELINES:** Several variables are known to influence the proper rate of application to prevent or resolve a specific nutrient demand or deficiency. Refer to the requirements of your state for specific crop recommendations or use in accordance with recommendations of a qualified individual or institution such as a certified crop advisor, university extension representative or publication, trained agronomist, or follow the guidelines of an approved nutrient management plan.

### Limitations, Restrictions, and Exceptions

**GENERAL SOIL APPLICATIONS:** Apply as a starter fertilizer or as a soil applied broadcast application in a balanced fertility program. Water may be added to increase application rate.
