WEED GROWTH CONTROL

General Information

PRODUCT FACTS

KILLS & PREVENTS ALL TYPES OF TOUGH WEEDS & GRASSES FOR UP TO 12 MONTHS Makes up to 5.3 gallons. Covers up to 1,600 sq ft.

This product is intended for use in areas where control of vegetation is desired for up to 12 months. It is not for use on lawns, on or around fruits, vegetables, flowers, trees, shrubs or other plants, or over the root zones of desirable vegetation.

HOW IT WORKS

IMPORTANT: To prevent new weeds and grasses from growing, YOU MUST SPRAY THE ENTIRE AREA you want to control, NOT JUST the emerged weeds.

Dual Action Formula Works 2 Ways:

1. Glyphosate is absorbed by the weed’s leaves. It moves through the weed to the root, stopping the function of an essential enzyme found in plants. Both glyphosate and diquat, cause weeds to begin to yellow and wilt within 12 hours with complete kill in 1 to 2 weeks. Weeds die, roots and all – so they don’t grow back.

2. Imazapic prevents new weeds from growing for up to 12 months by creating an invisible barrier in the soil.

WHERE TO USE

Apply only where you want to kill existing weeds AND prevent future weed growth for up to 12 months, such as:

- On cracks and crevices in driveways, sidewalks, and walkways
- Patios, paths and under decks
- Along fences, foundations and curbs
- Gravel and parking areas
- Along retaining walls and landscape borders

NOTE: In heavy clay soils, plant growth may be prevented for more than one year. In areas of heavy rainfall, applications every 6-8 months may be necessary. To avoid damage to desirable plants, DO NOT apply over their root systems. For shrubs and trees, DO NOT apply closer than twice the distance from the trunk to the drip line as roots may be within this area.

WHERE NOT TO USE

- DO NOT SPRAY plants or grasses you like – they will die.
- DO NOT USE in areas that will be planted or seeded within 12 months.
- DO NOT SPRAY landscaped areas around young plants or in areas next to any desirable plants or grasses.
- DO NOT USE over the root zone of desirable trees or shrubs.
- DO NOT USE on steep slopes as movement on soil surface may damage desirable plants down the slope.
- DO NOT SPRAY next to a fence if desirable plants and grasses are growing on the other side.
- DO NOT USE in lawns or for lawn renovation as this product prevents desirable grasses from growing too.
- DO NOT USE for vegetable garden preparation or in and around fruits and vegetables.

NOTE: For weed control in these areas use Roundup Ready-To-Use Weed & Grass Killer III or Roundup Weed & Grass Killer Super Concentrate.

TANK SPRAYER: Use of a Roundup® brand tank sprayer is recommended. A plastic, fiberglass, plastic-lined steel or stainless steel sprayer may also be used. Do not mix, store or apply using a galvanized or unlined steel (except stainless steel) sprayer.
- Add 6 fl oz (12 Tbs) per gallon of water.

- Each gallon covers 300 sq ft.

TO REFILL ROUNDUP READY-TO-USE MAX CONTROL 365 CONTAINER:

- This concentrate product can be used to refill the empty Roundup Ready-To-Use Max Control 365 container. See specific container label for refill instructions. Do not refill or reuse this container.

HOW TO APPLY

- Spray the existing weeds AND the entire surrounding weed-prone area you want to keep weed free for up to 12 months. Spray the area until thoroughly wet.

WHEN TO APPLY

- For best results, apply during warm, sunny weather above 60°F.

- Spray when air is calm to prevent drift to desirable plants.

- RAINPROOF: Rain or watering 30 minutes after application will NOT wash away effectiveness.

- Wait at least 12 months before spraying a previously treated area unless weeds reappear then re-spray the area as needed.

APPLICATION RESTRICTIONS: Do not apply this product in a way that will contact any person or pet, either directly or through drift. Only the person applying this product may be in the area during application.

Limitations, Restrictions, and Exceptions

NOTE: In heavy clay soils, plant growth may be prevented for more than one year. In areas of heavy rainfall, applications every 6-8 months may be necessary. To avoid damage to desirable plants, DO NOT apply over their root systems. For shrubs and trees, DO NOT apply closer than twice the distance from the trunk to the drip line as roots may be within this area.

WHERE NOT TO USE
• DO NOT SPRAY plants or grasses you like – they will die.
• DO NOT USE in areas that will be planted or seeded within 12 months.
• DO NOT SPRAY landscaped areas around young plants or in areas next to any desirable plants or grasses.
• DO NOT USE over the root zone of desirable trees or shrubs.
• DO NOT USE on steep slopes as movement on soil surface may damage desirable plants down the slope.
• DO NOT SPRAY next to a fence if desirable plants and grasses are growing on the other side.
• DO NOT USE in lawns or for lawn renovation as this product prevents desirable grasses from growing too.
• DO NOT USE for vegetable garden preparation or in and around fruits and vegetables
