

ROW AND NUT CROPS - SUGAR BEET

General Information

CAUTION: The application of fertilizing materials containing molybdenum (Mo) may result in crops containing levels of molybdenum (Mo) which are toxic to ruminant animals.

CAUTION: This product contains boron, therefore must only be used on crops listed on the label at the recommended rates and according to the directions for use. The use of this fertilizer material on any other crops may result in serious crop injury.

Limitations, Restrictions, and Exceptions
