

STONE FRUITS - PEACH

General Information

GENERAL APPLICATION INSTRUCTIONS

Apply the required amount of Vacciplant in combination with a registered fungicide in an appropriate volume of water. If Vacciplant is sprayed alone, apply at 0.15% volume/volume in applications exceeding 70 gallons per acre. At volumes under 70 gallons per acre, apply Vacciplant at 14 fluid ounces per acre. Do not apply this product post-harvest.

Limitations, Restrictions, and Exceptions

Application Instruction:

Start Vacciplant preventative applications immediately after transplant or planting in combination with an appropriate registered fungicide in an appropriate volume of water. Begin application 30 days before harvest. Repeat applications until conditions favorable for disease prevalence have diminished. Do not apply post-harvest.

- Application interval: 7-10 days
- No. of applications / season: 2-4
