

POME FRUITS - FIRE BLIGHT

General Information

GENERAL APPLICATION INSTRUCTIONS

Apply the required amount of Vacciplant in combination with a registered fungicide in an appropriate volume of water. If Vacciplant is sprayed alone, apply at 0.15% volume/volume in applications exceeding 70 gallons per acre. At volumes under 70 gallons per acre, apply Vacciplant at 14 fluid ounces per acre. Do not apply this product post-harvest.

Limitations, Restrictions, and Exceptions

Application Instruction:

Apply Vacciplant in an appropriate volume of water in combination with an appropriate registered bactericide from green bud stage to petal fall stage on one year old wood. After blooming time, continue Vacciplant applications if weather conditions are favorable for disease.

- Application interval: 7-10 days
- No. of applications / season: 2-7
