

BERRIES

General Information

GENERAL APPLICATION INSTRUCTIONS

Apply the required amount of Vacciplant in combination with a registered fungicide in an appropriate volume of water. If Vacciplant is sprayed alone, apply at 0.15% volume/volume in applications exceeding 70 gallons per acre. At volumes under 70 gallons per acre, apply Vacciplant at 14 fluid ounces per acre. Do not apply this product post-harvest.

Limitations, Restrictions, and Exceptions

Application Instruction:

Start Vacciplant preventative applications prior to early bloom in combination with a registered fungicide in an appropriate volume of water. Repeat applications until conditions favorable for disease prevalence have diminished.

- Application interval: 7-10 days
- No. of applications / season: 2-10
