

FERTIGATION APPLICATION - TRANSPLANT WATER - FIELD & ROW CROPS, ORCHARDS & VINEYARDS, VEGETABLE & FRUIT CROPS

General Information

GENERAL INFORMATION

Actagro 7% Calcium is formulated in a proprietary process for the prevention or correction of calcium deficiencies in plants and can be effectively used for both foliar and soil applications.

CAUTION: Always check compatibility with other products prior to use. Do not mix with conventional products containing the salts of heavy metals. Do not mix with conventional phosphorus based fertilizers.

CAUTION: Foliar application of Actagro 7% Calcium close to harvest may leave a brown residue on the harvestable portion of the crop. Rainfall, sprinkler irrigation or high humidity should alleviate this condition.

DIRECTIONS FOR USE

Actagro 7% Calcium can be applied to most vegetable and cucurbit crops, field and row crops, deciduous fruit and nut trees, grapes, berries, olives, avocados and citrus. 7% Calcium is designed for soil application and for foliar use. Apply directly to soils or inject through irrigation systems where water quality is satisfactory to maintain solubility. Foliar applications should be as a dilute spray. Application rates vary by crop or situation. Mixing with irrigation water for field storage is generally not recommended. Products blended with irrigation water should be used immediately and not stored for prolonged periods.

Limitations, Restrictions, and Exceptions

FERTIGATION APPLICATION

APPLICATION THROUGH DRIP IRRIGATION - inject after irrigation filter.

TRANSPLANT WATER - FIELD & ROW CROPS, ORCHARDS & VINEYARDS, VEGETABLE & FRUIT CROPS: Use 1 to 5 gallons per acre, not to exceed a 3% solution of Actagro 7% Calcium to water.
