

SOYBEAN

General Information

LCO Technology soybean

On-seed stability

- 120 days on-seed when applied alone or with slurry compatible seed treatments.
- For a list of compatible seed treatments, contact Monsanto Company at 1-877-775-8787.

Directions for application

- Ensure that treater has been properly calibrated.
- Pour Optimize liquid into mix tank.
- Pour in Optimize Liquid Additive.
- Start mix tank agitation.
- Apply at a rate of 1.5 fl oz/100 lb seed.
- Prepare only as much Optimize as will be used that day.

Seed treatment recommendations

- If used with seed treatments, apply recommended rate to Optimize mixture and agitate.
- We do not recommend the use of additional water, polymers, or dyes beyond what is required with the seed treatment.
- For a list of compatible seed treatments, contact Monsanto Company at 1-877-775-8787.
