

FRUIT CROPS (BERRIES) - DEFICIENCY SYMPTOMS

General Information

GENERAL INFORMATION

BREXIL Zn (0-0-0+Zn) is a zinc based product designed to treat and prevent zinc deficiency in all crops. The ligninsulfonate (LSA) derived ligninpolycarboxylic acid (LPCA) in BREXIL Zn allows for increased availability of zinc to the plant.

BREXIL Zn is a microgranule product that is completely water soluble. BREXIL Zn is only recommended as a supplement to a well balanced fertilizer program.

WARNING A compatibility jar test must be performed before mixing BREXIL Zn with products containing Calcium and or phosphate containing fertilizer.

DO NOT treat peaches, apricots and kiwis after fruit has reached half of its expected size.

SPRAY VOLUMES The standard spray volume on horticultural crops is 50 gallons per acre For spray volumes 5-20 GPA, use no more than 1lb/acre. For spray volumes less than 5 GPA, use no more than 1/2 lb/acre In Greenhouse applications, DO NOT apply more than 10 oz/25 gallons of spray
