

AS PHOSPHATE FERTILIZER ADDITIVE

General Information

P Max LFS is a phosphate fertilizer additive. When mixed with liquid fertilizers containing phosphate, P Max LFS increases phosphate efficiency and plant uptake. P Max LFS is not a substitute for recommended phosphate fertilization based on crop removal rates or yield goals.

DIRECTIONS FOR USE

P Max LFS easily mixes with Pre-Plant, Starter or Side-Dress liquid/suspension fertilizer solutions. It is however, recommended that, due to the potential variability in some liquid/suspension fertilizer solutions, compatibility is checked by mixing small quantities of each appropriate ration of fertilizer with P Max LFS. If coagulation occurs or sediments are formed - DO NOT USE THAT FERTILIZER AS A CARRIER. Do not mix with acid solutions with a pH below 4.

Limitations, Restrictions, and Exceptions

USE RATE: 1.0% v/v

1 gallon/100 gallons of liquid/suspension fertilizer solution.
