

FIELD VEGETABLES AND ORCHARD APPLICATIONS - REVITALIZATION OF OLD ORCHARDS

General Information

Proprietary Process!

Perfect Blend fertilizers are made using a proprietary process that produces a high quality nutrition to soil microbes that are responsible for breaking down minerals for plants while helping to maintain a balanced pH in your soil.

Application Rates - Most crop lands require two applications, one in the spring and one in the fall. High nitrogen crops may require up to three applications during the primary growing season.

Limitations, Restrictions, and Exceptions

Field Vegetables & Orchard Applications:

Revitalization of Old Orchards - Drill a 2" hole approximately 12" deep at a distance of 16"— 24" from the trunk of the tree. Fill to the top with fertilizer Permanent PVC pipes can be placed in hole to prevent the need for re-drilling the following season.
