

## **NON-CROPLAND (UP TO 50 PSI)**

### General Information

#### GENERAL INFORMATION

Drift Control is designed to reduce drift of water soluble emulsifiable concentrate, and wettable powder crop protection materials applied by aircraft or ground operated sprayers. Please see precautions for use with desiccants and defoliant.

Drift Control is exempt from requirements of tolerance under Title 40, Code of Federal Regulations, 180.

#### DIRECTIONS FOR USE

This product is intended for use with pesticides that are labeled for agricultural, forestry, right-of-way and non-crop uses. Not for aquatic use.

Shake before use. Do not add water to full Drift Control container. Add wettable powder and liquid crop protection materials before adding Drift Control into the mixing tank. Be sure agitator or pump is running when adding Drift Control and continue agitating for 2 or 3 minutes before applying the spray. If additional surfactants or spray adjuvants are used, they should be added last.

#### PRECAUTIONS

Some wettable powders are incompatible with Drift control. Before mixing large batches, test compatibility.

Cleaning of Equipment: Rinse the spray equipment with detergent, water solution rinse following use. Follow recommended procedures for disposal of pesticide solution.

Drift Control will control but not totally eliminate drift. Care should be used in handling pesticides. Follow recommendation on the label.

#### Limitations, Restrictions, and Exceptions

Spray Pressure: NON-CROPLAND Up to 50 psi

Nozzle Type and Orientation: Hand up with cone or variable type nozzles
