

ROW CROPS

General Information

GENERAL INFORMATION

TILL-ITBACKBONECA is designed for below seed row placement prior to planting to provide phosphate in a readily available form to strengthen early seedling growth and enhance stand uniformity. TILL-IT products should be used as part of a comprehensive Total Nutrition System for optimizing plant growth, development, yield, and quality.

DIRECTIONS FOR USE

Apply TILL-IT BACKBONE CA using recommended rates and directions.

Moisture conditions and planting strategy are important considerations when using TILL-IT BACKBONE CA. Apply total material 4-6 inches directly beneath where the seed shall be placed in a band, or utilizing a 3-winged vertical drench shank. Pre-irrigate prior to planting unless adequate rainfall will provide proper moisture conditions at time of planting.

TILL-IT BACKBONE CA should not be applied to other crops unless previous experience has proven safe and beneficial.

COMPATIBILITY

Do not mix TILL-IT BACKBONE CA with calcium fertilizers. Always jar test new combinations for compatibility prior to field mixing.
