

MICRONUTRIENT FERTILIZER

General Information

TIGER MICRONUTRIENTS Iron 22% (22%Fe, 55%S)

Granular Micronutrient Fertilizer

Product Description

TIGER MICRONUTRIENTS Iron 22% is a new formulation of granular micronutrients that offers several improved features over conventional micronutrient sources.

- Reduced heavy metal content
- Improved handling with cleaner (less dust) and uniform sizing.
- New “RCO” Technology allows for quick dispersion and increased performance.
- “Ultra Low” analysis products allows for greater micronutrient distribution and performance.
- Dual nutrient formulations allows for greater value over conventional source.

TIGER MICRONUTRIENTS Iron 22% is a unique, micronutrient fertilizer that delivers agronomically and economically, and provides excellent handling characteristics.

TIGER MICRONUTRIENTS Iron 22% provides a cost effective method of correcting Iron deficiencies which causes a reduction of photosynthesis within the plant (yellow effect)

Heavy Metals Analysis

TIGER MICRONUTRIENTS Iron 22% are environmentally safe. The reduced levels of Non-Essential nutrients (Heavy Metals), are a great reduction from current industry standards.

General Application and Use Recommendations

TIGER MICRONUTRIENTS Iron 22% when used as a part of a balanced fertility program, can provide a season-long source of Iron. TIGER MICRONUTRIENTS Iron 22% can be applied alone or blended with granular fertilizers. Amount required should be based on agronomic recommendations from soil tests, and tissue analysis.
